

Machine Learning 2014: Summary

Diana Ponce-Morado, Joachim Ott, Benjamin Ellenberger

December 4, 2014

Contents

0.1 Representations

This is the chapter on Representations.

0.1.1 Measurements and Data

0.1.2 Patterns

0.1.3 Data Types, Transformations, Scale

0.2 Regression

This is the chapter on Regression.

0.2.1 Linear Regression

0.2.2 Ridge Regression

0.2.3 LASSO

0.2.4 Nonlinear Regression by basis expansion

0.2.5 Wavelet regression

0.2.6 Bias variance Tradeoff

0.2.7 Gaussian Processes

0.3 Numerical Estimation Techniques

This is the chapter on Numerical Estimation Techniques.

0.3.1 Cross-Validation

0.3.2 Bootstrap

0.3.3 Jackknife

0.3.4 Hypothesis Testing

0.4 Classification

This is the chapter on Classification.

0.4.1 Problem Setting for Bayesian Inference

0.4.2 Bayes Rule

0.4.3 Parametric Models, Bayesian Learning

0.5 Parametric Models

This is the chapter on Parametric Models.

0.5.1 Maximum Likelihood Method

0.5.2 Efficient Estimators

0.5.3 Bayesian Learning (batch/online)

0.6 Design of Linear Discriminant Functions

This is the chapter on Linear Discriminant Functions.

0.6.1 Perceptrons

0.6.2 Fisher's linear discriminant analysis

0.7 Support Vector Machines

This is the chapter on Support Vector Machines.

0.7.1 Lagrangian optimization theory

0.7.2 Hard margin SVMs

0.7.3 Soft margin SVMs

0.8 Nonlinear Support Vector Machines

This is the chapter on Nonlinear Support Vector Machines.

0.9 Ensemble Methods for Classifier Design

This is the chapter on Regression.

0.9.1 PAC Learning

0.9.2 Bagging

0.9.3 Boosting

0.9.4 Arcing

0.9.5 Exponential Loss

0.10 Unsupervised Learning

This is the chapter on Unsupervised Learning.

0.10.1 Nonparametric Density Estimation

0.10.2 Histograms

0.10.3 Parzen Estimators

0.10.4 k-Nearest Neighbor Estimator

0.11 Neural Networks

This is the chapter on Neural Networks.

0.11.1 Motivation by Computational Neuroscience

0.11.2 Multilayer Perceptrons and Backpropagation

0.11.3 NETtalk and ALVINN

0.11.4 Boltzmann machines

0.11.5 Deep Neural Networks

0.12 Mixture Models

This is the chapter on Mixture Models.

- 0.12.1 k-Means Algorithm**
- 0.12.2 Mixture Models**
- 0.12.3 Expectation Maximization Algorithm**
- 0.12.4 Convergence Proof of EM Algorithm**
